Array Networks Wins Frost & Sullivan 2011 India IT & Telecom Excellence Award for 'Application Delivery Controller Vendor of the Year'

Award a testament to the relentless efforts of the Array Networks team in delivering exceptional business performance for the year 2010

MILPITAS, CA – May 17, 2011 – Array Networks Inc., (TWO: 3664) a global leader in application, desktop and cloud service delivery, today announced that it has been selected to receive the Frost & Sullivan 2011 India IT & Telecom Excellence Award for 'Application Delivery Controller Vendor of the Year'. As stated by Frost & Sullivan, this award is a testament to the relentless efforts the Array Networks team in delivering exceptional business performance within the India application delivery networking market for the year 2010.

Frost & Sullivan recognizes outstanding industry achievements by presenting IT and Telecom Excellence Awards to top companies in regional and global markets. The methodologies of determining the awards recipients are uniform. Frost & Sullivan analyst teams conduct detailed research and assessment on the market performance of companies such as revenue growth, market share growth, portfolio diversity, major customer acquisitions and business and market strategy to select the recipients in each category. After which, an independent and distinguished panel of judges comprising senior executives from the industry deliberate on the findings of the analyst team to decide on the deserving award recipients.

In bestowing the Application Delivery Controller Vendor of the Year award upon Array, Frost and Sullivan recognized the company's SpeedCore™-powered APV appliances for their ability to improve the availability, performance and security of application, cloud and IP data services while increasing server efficiency and reducing cost and complexity in the data center. Moreover, the panel of judges noted that Array Networks showed the strongest growth for application delivery controllers in the India market and is now one of the leading players in this region.

"We are delighted to be recognized by Frost & Sullivan as being the leading ADC vendor in India," said Michael Zhao, president and CEO at Array Networks. "Being rated as the fastest-growing ADC vendor in this region validates our efforts to help our customers grow their businesses in banking, government, telecommunications, software, education and many other enterprise verticals with the most cost-effective, scalable and secure application delivery solutions. With India's rapid adoption of IT, we are committed to continuing to deliver top-notch innovative technology solutions to meet evolving demands in the Indian market place."
