

FOR IMMEDIATE RELEASE

Array Networks Recognized for the Fourth Year by Gartner in 2016 Magic Quadrant for WAN Optimization

Evaluation based on Completeness of Vision and Ability to Execute

Milpitas, CA – June 2, 2016 – [Array Networks Inc.](#), a global leader in application delivery networking, today announces it was recognized in Gartner’s Magic Quadrant for WAN Optimization¹ for the fourth consecutive year. Array believes its inclusion for 2016 reflects a broadening of its aCelera product line in the areas of cloud and virtualization, enhanced feature capabilities and strong overall value – as well as continued traction in India in support of key storage partner solutions.

Array aCelera speeds data transfers and reduces application response times over wide area networks by reducing the amount of traffic transmitted between remote offices, remote users, data centers and clouds. Supporting up to 1Gbps throughput, Array WAN optimization controllers include functionality such as compression, deduplication, HTTP, TCP, Common Intern File System (CIFS), Messaging APO (MAPI), Citrix Independent Computing Architecture (ICA), traffic shaping and quality of service (QoS).

Noted the report, “Most wide-area networks carry a variety of application traffic types of differing characteristics and importance. Many organizations are striving to manage this traffic to optimize the response times of critical applications and to reduce costs, given that bandwidth continues to represent a significant proportion of operating expenditure for wide-area data networks.”

“Providing superior price-performance for WAN optimization, as well as a full end-to-end application delivery solution continues to be a winning strategy for Array’s emerging market efforts,” said Michael Zhao, president and CEO of Array Networks. “We are encouraged to see our strengths and strategies evaluated in the latest Gartner Magic Quadrant and are committed to further improvement based on meeting and exceeding customer expectations.”

About Array Networks

Array Networks is a global leader in application delivery networking with over 5000 worldwide customer deployments. Powered by award-winning SpeedCore® software, Array solutions are recognized by

leading enterprise, service provider and public sector organizations for unmatched performance and total value of ownership. Array is headquartered in Silicon Valley, is backed by more than 250 employees worldwide and is a profitable company with strong investors, management and revenue growth. Poised to capitalize on explosive growth in the areas of mobile and cloud computing, analysts and thought leaders including Deloitte, Red Herring and Frost & Sullivan have recognized Array Networks for its technical innovation, operational excellence and market opportunity.
